2in1 INTEGRATED ACOUSTIC LAYER

ACULAY
INTEGRATED **ACOUSTIC** LAYER

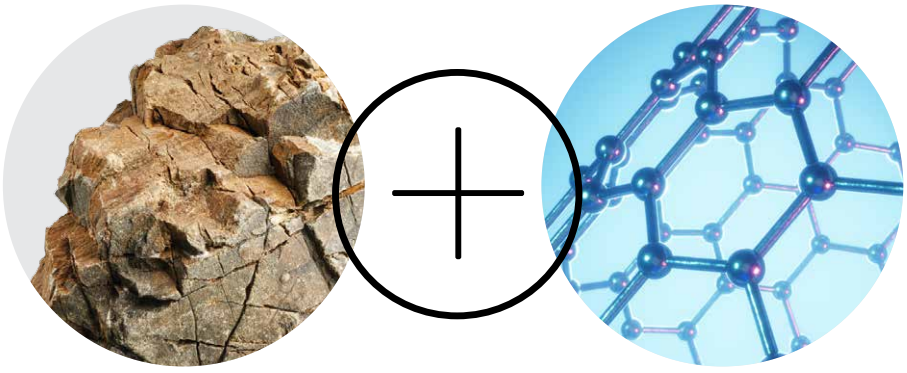

Integrated **Aculay Acoustic Layer** effectively enhances the floor's acoustic performance without the need for additional solutions. Noise reduction of **up to 21 dB (10 dB ΔLin)** translates into a clearly perceptible improvement in user comfort – an increasingly important factor in end-customer product selection. Tests conducted by TFI Aachen confirm a fourfold reduction in sound intensity, positioning Aculay technology among the most effective acoustic solutions currently available on the market. Its application across an expanded range of collections supports the creation of a consistent offer based on a uniform acoustic comfort standard aligned with current market expectations.

HD MINERAL CORE®

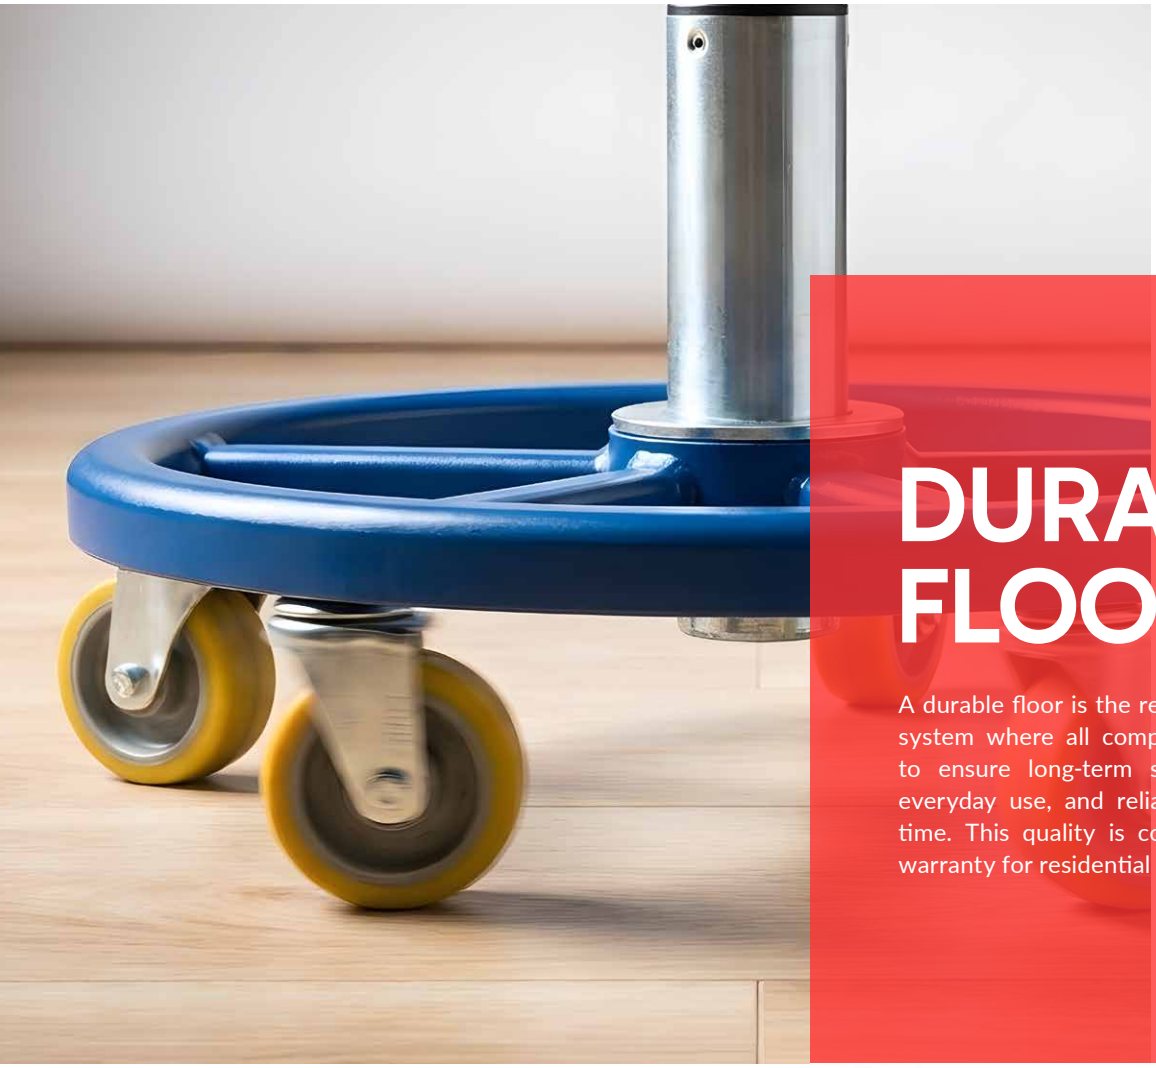

The **HD Mineral Core®** is responsible for the floor's structural stability and durability, ensuring resistance to everyday use and operational loads. Its homogeneous mineral structure supports dimensional stability and predictable performance parameters over long-term use. As a result, **HD Mineral Core®** provides a solid foundation for products designed for intensive use and high quality requirements, which have become standard in the modern flooring segment.

Hardness and durability of natural rock minerals

The flexibility of modern polymers based on carbon

DURABLE FLOOR

A durable floor is the result of a well-designed system where all components work together to ensure long-term stability, resistance to everyday use, and reliable performance over time. This quality is confirmed by a 15-year warranty for residential applications.

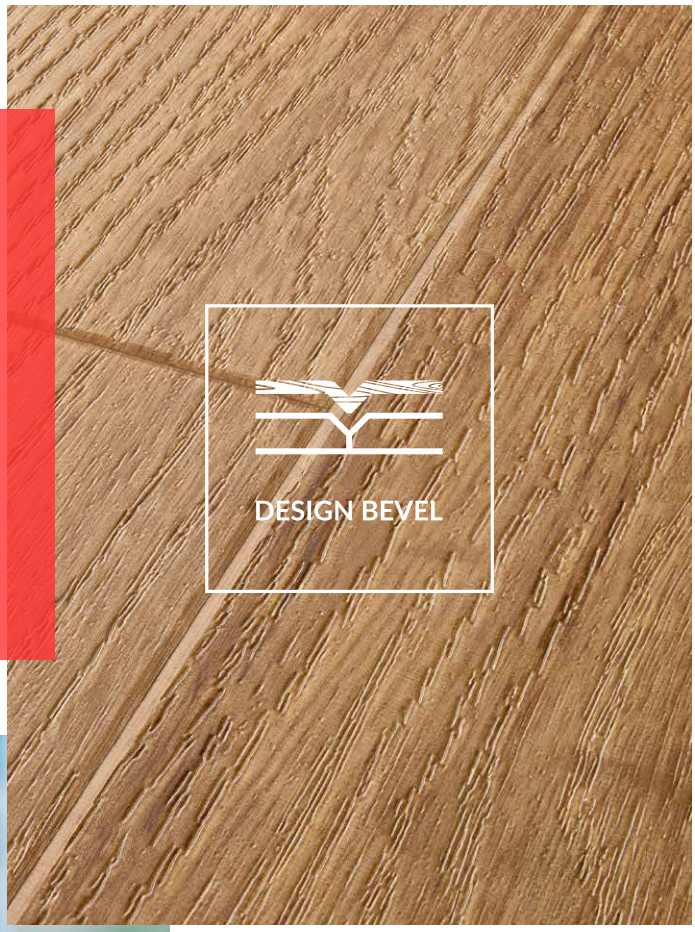

2G 5Gi

LOCKING SYSTEMS

The durability of a floor depends on the entire system, with plank connections playing a key role. That is why 4Everclic uses licensed Välinge locking systems – proven solutions designed for long-term reliability. Classic planks are equipped with the durable 2G lock, whose simple and intuitive design allows for easy self-installation, even for users without prior experience. Herringbone collections feature the precise and robust 5Gi system, ensuring overall floor stability.

PERFECT CONNECTION

The natural wood-inspired structure and precise beveling reflect current market trends, meeting the expectations of both DIY customers and professionals while combining attractive design with everyday functionality.

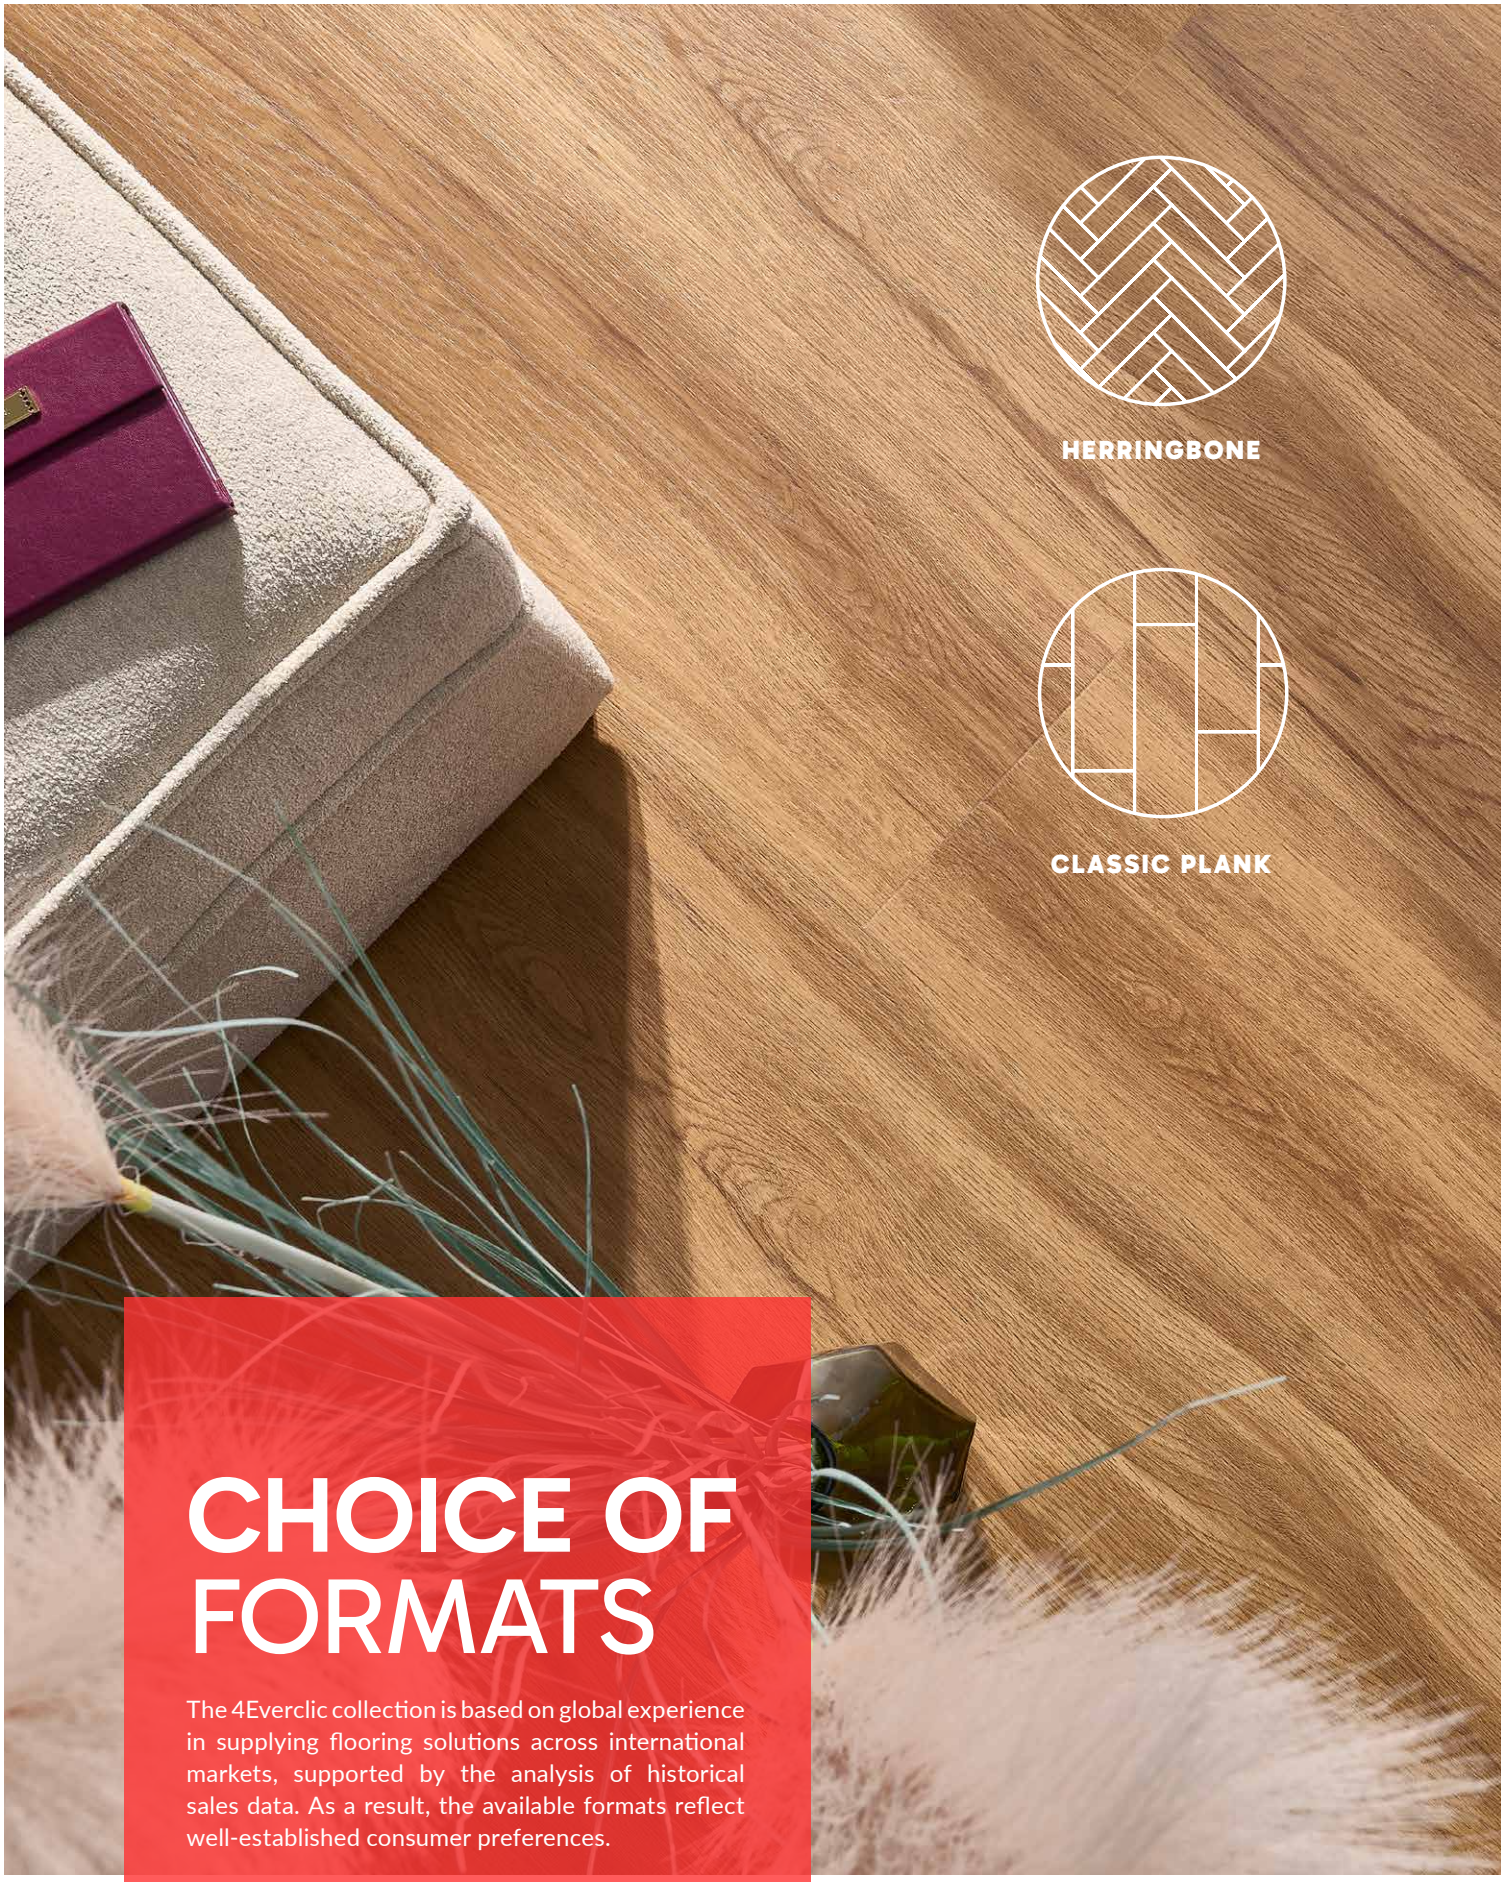

100%
WATERPROOF

WATER RESISTANCE AND EASY MAINTENANCE

The fully waterproof construction protects the floor from moisture, stains, and dirt, making it ideal for intensively used homes, including those with children and pets. An easy-to-clean surface allows for quick removal of dust, dirt, and allergens, ensuring everyday comfort and a hygienic environment.
